PETTIS, BASSETT & CO

This Week's Amusements.
The Grand will be closed until Thursday night,
when Miss Solena Fetter, Mr. Ramsey Morris
and their company will begin an engagement in
the dramatization of Mr. Morris's novel "Cru-
city Her" entitled "The Tigris." This attraction
is of unusual excellence. The advance sale
will begin to-morrow.
Beginning with the matinee this afternoon the
Park will have for an attraction Mr. Edward J.
Hassan's elaborate scenic production of the
comedy drama "One of the Fines," with special
scenery, realistic effects and a good cast. The
piece is a popular one.
The new Eden Musee and theater opens to-
day for the season with "Admiral Tod," Miss
Fatima, Angelo the bird man and a host of other
attractions, besides a selected specialty show.
The admission to all is but ten cents, and it is
open afternoon and evening.

New Cars for the Street Railway.
The Citizens' Street-Railway Company, last
week, received from the St. Louis car-works
twelve new closed cars, and it has thirty more
ordered. These cars are of better style than
those now in use, and are so arranged that with
but little trouble they can be converted from
hot-tail to double-deck cars. The company is
getting matters into shape to do its own repair-
ing.

No Bloodhounds to Be Had.
A telegram was received at the police station
last night from S. A. Canada, prosecuting at-
torney at Winchester, asking the police here to
send on the first train bloodhounds to run down
Victor Hill, who had committed a double murder
there. Captain Campbell sent a reply that the
request could not be granted, as he knew of
no bloodhounds in the city.

Knocked Down by the Turkey.
M. C. Boyle was brought into the station-
house last night, on the charge of stealing a
necktie. While he was being put in the cell
he struck at Officer Taffy, who, in defending
himself, planted his flat squarely in Boyle's
mouth, which put an end to the trouble. The
other's hand was badly lacerated by striking the
teeth of the prisoner.

The Base-Ball Club at Home.
The Indianapolis ball club reached home last
night, after an absence of six weeks. The club
has been playing exhibition games in the East
since the regular League season closed, and will
play several more unless the weather should be-
come too cold. Thursday and Friday they play
here with the Cincinnati.

New parlor goods at Wm. L. Elder's.

VIEWS ON PRISON REFORM

Indeterminate Sentences Considered
Effective in Reclaiming Criminals.

Discourses in Which That Idea Is Strongly
Urged—Dr. Cleveland on Progressive
Christianity—Sermon to Prisoners.

A congregation that completely filled Pymouth Church yesterday morning heard Rev. Oscar McCulloch preach on "Prison Reform." The minister took for text Matthew, xiv, 36—"I was in prison and you came unto me." In these words, Mr. McCulloch said, the prisoner identifies himself with all in prison. He does not distinguish between good and bad, but justly and unjustly condemned, but includes all. It is the Christ spirit in the world that creates the sympathy one feels for all suffering. One of the latest phases of this is seen in prison reform. It is now, beginning with John Howard in 1773, but it grows each year stronger. The National Prison Congress meets annually to discuss questions which make for better prison management. These are not "cranks" or idealists, but wardens, superintendents, physicians, chaplains. Out of this has come a new science—penology. Simple societies need but few prisons. The first prison in this city was a log house, and one man confined in it for a few days, was let go at once, and led the country. But in complex societies, prisons are necessary. There are now 60,000 persons in prison. In England it is steadily diminishing. In this country it is a best keeping pace with population. But it is to be noted that most of the prison population in the United States is of the foreign element.

Prisoners of this land differ much among themselves. The State prison is a collection for a long time was an old copper mine. In the South the prisons are the worst, consisting frequently of pens or stockades. Here exists the worst of the development of the country, and the prison camps. Over 5,000 are thus sold out, and are in railroad or wood camps, guarded by armed men, and hunted when they escape by the forest. In other prisons in the North, however, often better, but in the main the spirit of the new movement is at work in them—much money is spent in them. At the top of all modern prisons is the Elmira Reformatory, New York. Every prisoner does not necessarily belong to the criminal class—that is, to those who habitually prey upon society. Only about 20 per cent. of the prisoners are of this class. The rest are those in jail who, through weakness, ignorance, or through liquor, have gone wrong. In punishment there are three ideas: deterrence, reformation, and restoration. Under the old idea of punishment was the thought of vengeance. In England 19 offenses were punishable with death. John Howard led the reform in 1773, and since his time a new spirit has animated prison treatment—humanity and reformation. Modern prison treatment rests on two thoughts: that the prisoner is an offender and must be punished by being taken away from his home, with whom he is used to live, and that the prisoner is a morally diseased person and must be cured. Crime is a moral disease and must be treated by isolation, the education and discipline of work and study. The results of the new method are that 100 of those who go to State prisons 60 per cent. return again, while of those who are discharged from the Elmira Reformatory only 20 per cent. have had an after criminal history.

"The conditions that nourish a criminal class are many," said the preacher. "In the Charity Organization Society we have traced the history of thirty families through five generations. They number 1,720 persons. Each one of these has a history as a criminal, pauper or prostitute. But these thirty families are not all. Nearly as full records are had of 350 families, numbering over 6,000 individuals with the same history. In these families, disease, physical weakness, ignorance and public and private benevolence have been the fostering cause."

"The Christ-spirit, which is the force in modern philanthropy, looking on all these, is not satisfied to leave them out, feels impelled to attempt their restoration. "The principles which underlie prison reform are first," continued the preacher, "that the prisoner is a man; a man gone wrong, but yet a man, subject to all the influences which surround a man. He may be subdued by kindness, and will respond to appeals; may be educated, taught love, human fellowship and self-reliance; imbruted, imprisoned, buried deep in the mud, but it is there. Again, there should be a separation of old offenders from young, as a hospital physician separates cases. Old offenders inoculate young ones. As well put a small-pox patient into a children's ward. This city's jail has been a nursery of crime, a school for the education of criminals. Had the school board specially de- signed it as such it could not have been more successful. The congregating of men and women, boys and girls, witnesses and persons, waiting for the action of the grand jury, has done much toward the increasing of our criminal population. There should be also an indeterminate sentence. A person should be in prison for a definite term, ten days or ten years. But if the idea is reformation there, as in this case, there can be no definite term. No one is sent to the hospital for a stated term, two, or three, or four, or five, or six, or seven, or eight, or nine, or ten, or twenty, or thirty, or forty, or fifty, or sixty, or seventy, or eighty, or ninety, or one hundred, or two hundred, or three hundred, or four hundred, or five hundred, or six hundred, or seven hundred, or eight hundred, or nine hundred, or one thousand, or two thousand, or three thousand, or four thousand, or five thousand, or six thousand, or seven thousand, or eight thousand, or nine thousand, or ten thousand, or twenty thousand, or thirty thousand, or forty thousand, or fifty thousand, or sixty thousand, or seventy thousand, or eighty thousand, or ninety thousand, or one hundred thousand, or two hundred thousand, or three hundred thousand, or four hundred thousand, or five hundred thousand, or six hundred thousand, or seven hundred thousand, or eight hundred thousand, or nine hundred thousand, or one million, or two million, or three million, or four million, or five million, or six million, or seven million, or eight million, or nine million, or ten million, or twenty million, or thirty million, or forty million, or fifty million, or sixty million, or seventy million, or eighty million, or ninety million, or one hundred million, or two hundred million, or three hundred million, or four hundred million, or five hundred million, or
